SPECIALTY LUBRICANTS

## VERSA-LUBE 424

***Excellent Oil Additive Design to Rejuvenate Seals***

Premium Quality Base Oils

Superior Quality Additives

Boosts Anti-Wear

Boosts Non-Foaming Ability

Rust/Oxidation Package

Rejuvenates Seals/Gaskets

*“Retail brand products too often lack sufficient levels of key additives. When using a premium product is not an option, due to product loss, hose breaks or jeopardized equipment, VERSA-LUBE is ideal.”*

VERSA-LUBE 424 is a remarkable performance boosting additive, offering a variety of benefits. For example, we have customer that prefers to use retail brand hydraulic fluids over our torque trans or hydraulic fluids while operating in environments where snagged or broken hoses are common. Adding VERSA-LUBE 424 to retail brand oils gives them a boost in performance capabilities and allows them to function more closely to a premium product. By boosting the anti-foam, we can reduce hydraulic lag, reduce temperatures, slow oxidation, and preserve seals. Increasing anti-wear to levels that protect hydraulic pumps or other components is another primary benefit. In addition, VERSA-LUBE 424 offers seal rejuvenating chemistry that helps reduce or eliminate leaks due to compromised seals and pliable gaskets.

# **VERSA-LUBE 424**

## **Product Specifications**

<b>TYPICAL ANALYSIS</b>	<b>RESULTS</b>
Viscosity @40°C, cSt	50
Pour Point, °F.	-45
Flash Point, °F.	420
Specific Gravity	.88
Weight/gallon	7.32 lbs.

Sharing lubricant knowledge and delivering the highest quality products, two things we promise our customers. The difference will change how you view, purchase and utilize greases and oils from here forward.
