spraytec

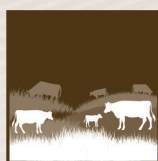

Nutrekit is a bovine nutritional complex designed for application directly on forages. This ensures greater natural mineral supplementation while also promoting greater vigor and more volume per acre. The nutrients, vitamins, and amino acids, provided in organic form by Nutrekit to the plant are fully utilized, consequently increasing milk or meat production in your herd.

Triple Action

Pasture

Increased quantities, digestibility, and palatability of fibers and dry matter are greater per acre.

Herd

Amino acids, vitamins, macronutrients and micronutrients when ingested are fully used by the animal.

Health

It nourishes the plant, strengthens the root, and ensures greater tolerance and resistance to pests and diseases, ultimately providing greater health to forages.

More feed per acre
Deeper root system
Higher yield
Healthier forage

Higher quality nutritional feed
Higher digestibility
Higher palatability
Application technology

NUTREKIT (20DAA)

NATIVE FIELD

Source: Mascena, J. (2014). DAA = Days After Application

Directions for use:

- Start filling the tank
- With the mixer on, add NutreKit
- Fill tank completely
- Add pesticides
- Apply

Crop

Rates

Growth stage

Forage

Nutrekit 10 fl.oz/acre
Fulltec Zinc 4-5.5 fl/oz/acre

New seeding - apply after 30 days old.
Old Seeding - apply 7 d ays after cutting or grazing

Net content 2.1 gal of Nutrekit + 1.05 gal of Fulltec Zinc
