

Description

FULLTEC ZINC

Fulltec Zinc is a fully available and secure source of Zinc developed to increase your corn ear size and stalk diameter when applied in early stages. The product acts in synergy with pesticides to fulfill early-season Zn deficiency due to cool, wet, and cloudy conditions, by glyphosate applications, or even by high pH soil conditions.

Main Benefits:

Effectiveness:

The 100% water-soluble EDTA Zinc present in the formulation is 2-5 times more effective than any other form of Zinc.

Stress-relief:

The Zinc phosphites increase the plant's tolerance to diseases and abiotic stress.

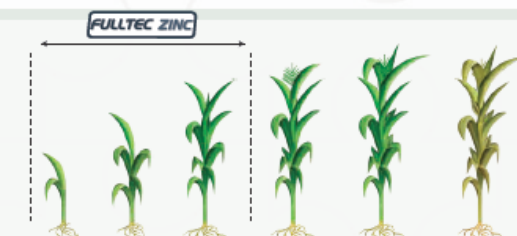

Convenience:

Due to its effectiveness, Fulltec Zinc has a low use rate and a convenient package that saves space and time.

Directions

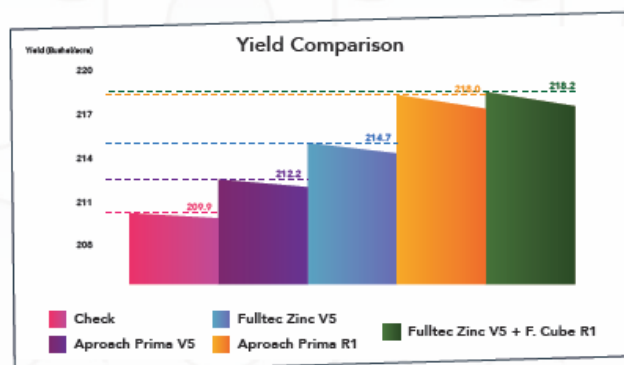

Crop	Rate	Timing
Corn	4.0 oz/acre	V4 - V8
Wheat	2.7 oz/acre	Elongation
Cereals	4.0 oz/acre	V3 - Vn
